

When Jim asked about a professional reference from me I had to really sit and ponder a great deal of past history for you see in making a full disclosure I have known this gentleman for just over forty years. Initial association came through a mutual attorney friend who represented us both over the years. In the ensuing years we became friends and he provided professional computer consulting services to the law enforcement agency I managed.

As a result of the professional and personal association I can offer the following:

- Observation of his computer business operation over ten years which encompassed Retail Sales,
- Computer Repair, and in house Computer Training.
- Knowledge of professional services he rendered businesses and to local county, state, and federal government entities in the Key West and lower Florida Keys area.
- Observed him create and manage a local Internet Service Provider System for the Key West hinterlands.
- Knowledge of his personal internet marketing business both as a customer of his product and
- As a friend.

In short, I could have been less verbose and more succinct and just recommended that for anyone seeking consulting services on computer operations and systems, internet business and marketing, and or retail business establishment you would be well served by the consulting services being offered by JIM CAREY AND ASSOCIATES AND HAWAII ACTIVITY MARKETING. Anyone wishing to contact me directly for any additional confirmation or information feel free to do so.

Lawrence A. Meggs, Colonel (Ret.) Monroe County Sheriff's Office, Key West, Florida
